

Project Scope Spec

Client request

The client wants a reply assistant for WhatsApp Business conversations. It should read the current thread, understand the context, draft a reply suggestion in the owner's tone, and leave the final send action to the owner.

Client deliverables

- A WhatsApp bot for reviewing incoming customer messages and surfacing reply suggestions.
- A private workspace for editing the assistant's tone and knowledge.
- A reply suggestion drafted from the current WhatsApp conversation.

Workflow

1. A customer sends a message in WhatsApp Business.
2. The WhatsApp bot captures the new message and loads the thread context.
3. The assistant uses the configured tone and knowledge from the private workspace to draft one suggested reply.
4. The WhatsApp bot shows the suggested reply drafted by the assistant.
5. The owner reviews and edits the suggestion.
6. The owner sends the final reply manually in WhatsApp Business.
